Any of your investment decision should be fully based on your assessment of your personal financial circumstances and investment objectives. GECA draws your attention to the fact that transactions in the securities and financial instruments market involve risk and require appropriate knowledge and experience. The Smart Industry 4.0 portfolio was launched on September 3, 2018. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance whether actual or back-tested is no indication or guarantee of future performance.

INDEX METHODOLOGY: The index is based on the MSCI Global Investable Market Indexes (GIMI) Methodology —a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations. This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability. The index is reviewed quarterly—in February, May, August and November—with the objective of reflecting change in the underlying equity markets in a timely manner, while limiting undue index turnover. During the May and November semi-annual index reviews, the index is rebalanced and the large and mid capitalization cutoff points are recalculated. The MSCI ACWI captures large and mid cap representation across 23 Developed Markets (DM) and 26 Emerging Markets (EM) countries*. With 2,852 constituents, the index covers approximately 85% of the global investable equity opportunity set.
